Mr. George Skala IV, PG, PMP
Remedial Project Manager
United States Environmental Protection Agency, Region IV
Atlanta Federal Center
61 Forsyth St.
Atlanta, GA 30303-8960

RE: July 2026 Progress Report
Anniston PCB Site (Docket No. 1:02-cv-0749-CLM)
Anniston, Alabama

Dear Mr. Skala:

Please find attached the July 2026 Progress Report for the Partial Consent Decree between Solutia Inc., Pharmacia LLC (collectively P/S) and the United States Environmental Protection Agency (EPA) entered by the United States District Court for the Northern District of Alabama (Court) on August 4, 2003, the Consent Decree for Remedial Design/Remedial Action for Operable Unit No. 3 between P/S and the EPA entered by the Court on April 17, 2013, and the Consent Decree for Remedial Design/Remedial Action for Operable Unit Nos. 1 and 2 between P/S and the EPA entered by the Court on March 26, 2021. This report describes the work performed, unanticipated issues encountered, and analytical data received during the reporting period of July 1, 2026, through July 31, 2026. The report also describes upcoming developments anticipated for the months of August and September 2026.

If you should have any questions concerning this matter or need additional information, please call me at (256) 231-8404.

Sincerely,

E. Gayle Pittman Macolly
Principal Remediation Manager, Major Projects
Solutia Inc.

1.0 INTRODUCTION

1.1 2003 Partial Consent Decree

This monthly progress report has been prepared in accordance with the requirements of the 2003 Partial Consent Decree (2003 CD) between the United States Environmental Protection Agency (EPA), Solutia Inc. (Solutia), and Pharmacia LLC (Pharmacia) entered by the United States District Court for the Northern District of Alabama (the Court) on August 4, 2003 (Docket No. 1:02-cv-0749-CLM). The 2003 CD was issued under Sections 106, 107, and 113(g)(2) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), 42 U.S.C. §§9606, 9697, §9613(g)(2). The 2003 CD provides for and defines the performance of studies and response work by Solutia and Pharmacia at the Anniston PCB Site (Site). Solutia and Pharmacia, with Monsanto performing work on behalf of Pharmacia, are referred to as "P/S" in the subsequent sections of this report.

In accordance with Appendix A Section XIII (47), Appendix B Task 2, and Appendix G Section VI (2.5) of the 2003 CD, Section 2.0 of this report describes the work performed during the period of July 1, 2026, through July 31, 2026, including actions taken, unanticipated issues, if applicable, and analytical data received during the reporting period. Section 5.1 of this report also describes upcoming developments anticipated over the next two months for the work required by the 2003 CD, including scheduled dates of actions to be performed and planned resolutions of past or anticipated problems, if applicable.

1.2 2013 Operable Unit 3 (OU-3) Remedial Design/Remedial Action Consent Decree

The Consent Decree for the Remedial Design/Remedial Action for Operable Unit 3 (OU-3 RD/RA CD) between the EPA and P/S was entered by the Court on April 17, 2013 (Docket No. 1:02-cv-0749-CLM). The OU-3 RD/RA CD, which encompasses the Solutia plant and the adjacent closed South and West Landfills, provides for the implementation of the remedies selected for OU-3 as described in the Interim Record of Decision (IROD) issued by Region 4 of the EPA on September 29, 2011.

In accordance with Section X. Paragraph 31 of the OU-3 RD/RA CD, Section 3.0 of this report describes the work performed for the OU-3 RD/RA during the period of July 1, 2026, through July

31, 2026, including actions taken, unanticipated issues, if applicable, and analytical data received during the reporting period. Section 5.2 of this report describes the upcoming developments anticipated over the next two months for the work required by the OU-3 RD/RA CD, including scheduled dates of actions to be performed and planned resolutions of past or anticipated problems, if applicable.

1.3 2021 Operable Unit 1/Operable Unit 2 (OU-1/OU-2) Remedial Design/Remedial Action Consent Decree

The Consent Decree for the Remedial Design/Remedial Action for Operable Unit 1/Operable Unit 2 (OU-1/OU-2 RD/RA CD) between the EPA and P/S was entered by the Court on March 26, 2021 (Docket No. 1:02-cv-00749-CLM). The OU-1/OU-2 RD/RA CD provides for the implementation of the remedies selected for OU-1/OU-2 as described in the OU-1/OU-2 Record of Decision issued by Region 4 of the EPA on November 9, 2017. This includes remedial actions for soils, sediments, and groundwater at residential and non-residential properties outside of OU-3.

In accordance with the OU-1/OU-2 RD/RA CD Scope of Work (Appendix B Paragraph 5.1), Section 4.0 of this report describes the work performed for the OU-1/OU-2 RD/RA CD during the period of July 1, 2026, through July 31, 2026, including actions taken, unanticipated issues, if applicable, and analytical data received during the reporting period. Section 5.3 of this report describes the upcoming developments anticipated over the next two months for the work required by the OU-1/OU-2 RD/RA CD, including scheduled dates of actions to be performed and planned resolutions of past or anticipated problems, if applicable.

2.0 2003 CD WORK PERFORMED DURING REPORTING PERIOD

2.1 General 2003 CD Activities

2.1.1 Administrative Submittals

A 2003 CD submittal schedule for the Site that includes this reporting period's submittals and/or submittals awaiting approval or response is included as Table 1. This schedule includes the dates that documents were submitted to the EPA and the dates that approvals or comments were received from the EPA.

2.2 Operable Unit 1/Operable Unit 2 (OU-1/OU-2)

2.2.1 Residential Removal Properties Program

The residential program consists of residential work associated with the 2003 CD. This includes the non-time critical (NTC) residential activities as well as time critical residential activities associated with the Administrative Order on Consent (AOC), effective October 5, 2001.

P/S continued to work with the local municipalities and property owners to implement the approved NTC Removal Action Interim Institutional Control Program for Residential Properties (Interim IC Program). Table 2 provides a summary of the number of properties in each IC group.

2.2.1.1 Residential Removal Access

Access activity includes updating owner/tenant information, access request information, and/or EPA notification of non-compliance information. During this reporting period, access was requested for surface sampling in the footprint of a former structure at one property (Attachment A) and removal action access was requested at one property (Attachment B).

There are eight residential properties in the Residential Removal Properties Program where access has not been granted and one special use property where access has been requested. One residential property has granted access, and a removal action is scheduled. The properties are summarized in Table 3. A description of each residential property's status is presented in Table 4 and special use property in Table 5.

2.2.1.2 Residential Removal Activities

During this reporting period, P/S performed sampling at two properties in Evaluation Areas 1-35. Validated analytical sampling data was received for two residential properties (Attachment C) and one special use property (Attachment D) during this reporting period.

2.2.2 OU-1/OU-2 Non-Residential Program

P/S continued to perform the required routine inspections of the Central Staging and Soil Management Area (CSSMA) and South Staging and Soil Management Area (SSSMA). No adverse findings were noted during the inspections.

2.2.3 11th Street Ditch

P/S will perform the next quarterly routine inspection in September 2026.

2.3 Operable Unit 4 (OU-4)

2.3.1 OU-4 Non-Residential Program

There was no activity during this reporting period.

2.4 Special Studies

P/S continued the fish-tracking study for the Special Studies Downstream of OU-4. Validated data for the fish tissue samples (fillets) collected in October and November 2025 are presented in Table 6, and the validated data for the whole-body fish tissue samples collected in October 2025 are presented in Table 7.

The June monthly progress report contained an error on the composite sediment sample results table for the mercury result for the composite sediment sample SED-39. The mercury result was incorrectly reported as 36 milligrams per kilogram (mg/kg) rather than 0.036 mg/kg. Table 8 shows the corrected value. Additionally, the total organic carbon data for all the composite samples presented in Table 8 have been revised to report the results in mg/kg instead of micrograms per kilogram as they were presented in the June monthly progress report.

2.5 Community Advisory Group

A CAG meeting was held on July 14, 2026, at the Oxford Civic Center. There were 3 members of the CAG and 6 members of the public in attendance at the meeting. The meeting was open to the public to allow residents to observe the working session and to comment or ask questions. Topics discussed at the CAG meeting included:

- an update from the Technical Advisor;
- an update from the EPA; and
- an update from P/S.

The next CAG meeting is scheduled for September 8, 2026, via teleconference.

3.0 OU-3 RD/RA CD WORK PERFORMED DURING REPORTING PERIOD

3.1 General OU-3 RD/RA CD Activities

3.1.1 Administrative Submittals

A CD submittal schedule for OU-3 that includes this reporting period's submittals and/or submittals awaiting approval or response is included as Table 9. This schedule includes the dates that documents were submitted to the EPA and the dates that approvals or comments were received from the EPA.

3.2 Remedial Action

P/S completed soil sampling on June 16, 2026, and July 14, 2026, to support construction of Carbon Treatment System #4. The data will be reported once the validation process is complete.

On April 15, 2026, P/S completed the fourth quarterly baseline sampling of the interceptor wells at the four groundwater corrective action systems at OU-3 in accordance with the Optimization Work Plan. Validated data are presented in Table 10.

4.0 OU-1/OU-2 RD/RA CD WORK PERFORMED DURING REPORTING PERIOD

4.1 General OU-1/OU-2 RD/RA CD Activities

4.1.1 Administrative Submittals

A CD submittal schedule for the OU-1/OU-2 RD/RA CD that includes this reporting period's submittals and/or submittals awaiting approval or response is included as Table 11. This schedule includes the dates that documents were submitted to the EPA and the dates that approvals or comments were received from the EPA.

4.1.2 OU-1/OU-2 Non-Residential Program

On March 12, 2026, P/S submitted the Preliminary (30%) Remedial Design (PRD) documents for OU-1/OU-2. The PRD documents included three components: 1) Residential and Nonresidential Soil, 2) Sediment and Creek Banks, and 3) the T-11 Area.

EPA provided comments on the Residential and Nonresidential Soil PRD on April 28, 2026, and P/S submitted responses on June 4, 2026. EPA provided additional comments on June 10, 2026. P/S will incorporate the additional comments in the Pre-Final (90%/95%) Remedial Design, scheduled for submission by September 25, 2026.

On May 12, 2026, EPA provided a comment on the Sediment and Creek Banks PRD. P/S submitted a response to this comment on June 26, 2026. On July 14, 2026, P/S received additional feedback from the EPA. This response and clarification will be incorporated into the Pre-Final (90%/95%) Remedial Design submittal, scheduled for submission by October 9, 2026.

EPA provided comments to the T-11 Area PRD on May 21, 2026. P/S submitted a response to comments on June 29, 2026. P/S received additional clarification from the EPA on July 23, 2026, regarding the previous response to comments. These responses will be incorporated into the Pre-Final (90%/95%) Remedial Design submittal, scheduled for submission by October 19, 2026.

On March 11, 2026, P/S submitted Revision 2 of the Unified Federal Policy – Quality Assurance Project Plan (QAPP) that is a component of the PRD. EPA provided comments to the QAPP on

May 28, 2026. P/S are currently preparing a response to those comments as well as a revised QAPP. On June 30, P/S held a conference call with EPA and the Special Master to the Court, to discuss whether P/S can proceed with the proposed additional sampling efforts in support of the Remedial Design prior to EPA approving the revised QAPP. P/S received conditional approval from the EPA on July 1, 2026, to complete fieldwork under the draft QAPP understanding that the final QAPP will be submitted for approval.

On June 2, 2026, P/S collected a groundwater sample from CMW-3 as requested in the EPA's additional comments. Validated data are presented in Table 12.

On July 15, 2026, P/S completed the abandonment of the Eastside wells and piezometers.

On July 15, 2026, P/S conducted quarterly groundwater sampling at the T-11 area. The data are pending validation.

5.0 WORK SCHEDULED

5.1 2003 PCD Anticipated Work Activities

During the months of August and September 2026, the following work elements are anticipated:

- Obtain and/or process access for performing residential sampling and removal activities in OU-1/OU-2 according to the Supplemental Sampling and Analysis Plan (SSAP) and the Addendum to the NTC Removal Action Work Plans for the Site (as necessary);
- Perform surface, depth, indoor dust and/or crawl space sampling of residential properties in OU-1/OU-2 as access is provided (as necessary);
- Perform residential removal activities according to the associated work plans (as necessary);
- Perform CSSMA and SSSMA inspection and maintenance requirements in accordance with the approved CSSMA Operating and Closure Plan, the approved SSSMA Operating and Closure Plan, and the SSSMA Interim Operations and Maintenance Plan;
- Perform 11th Street Ditch inspection and maintenance requirements in accordance with the approved schedule;
- Prepare and submit a Construction Support Work Plan for the sewer main project in Oxford;
- Continue to implement the Special Studies Downstream of OU-4 in accordance with the Work Plan/Field Sampling Plan and QAPP;
- Respond to the EPA's comments, as necessary, on deliverables submitted to the EPA for approval; and
- The CAG will hold a regularly scheduled meeting on September 8, 2026, via teleconference.

5.2 OU-3 RD/RA CD Anticipated Work Activities

During the months of August and September 2026, the following work elements are anticipated:

- Complete the CTS #3 and SWMU 1 well control upgrades; and
- Respond to the EPA's comments, as necessary, on deliverables submitted to the EPA for approval.

5.3 OU-1/OU-2 RD/RA CD Anticipated Work Activities

During the months of August and September 2026, the following work elements are anticipated:

- Submit the Residential and Nonresidential Soil Pre-Final (90%/95%) Remedial Design by September 25, 2026; and
- Respond to the EPA's comments, as necessary, on deliverables submitted to the EPA for approval.

INTERIM IC GROUP COUNTS
ANNISTON PCB SITE
Anniston, Alabama

Area	IC Group 2[1]	IC Group 3[2,4]	IC Group 4[3,4]	Total
OU-1/2	315	98	44	**457**
OU-4	12	6	0	**18**
Total	**327**	**104**	**44**	**475**

[1)] IC Group 2 includes properties where residual PCB-containing soil may remain on the property but such presence has not been confirmed (e.g., PCBs beneath structures or driveways).

[2)] IC Group 3 includes properties where PCB levels in the surficial soil are less then 1 ppm, but are between 1 and 10 ppm at 12 inches or more below the existing ground surface. IC Group 3 properties may also include improvements (e.g., houses, driveways) where residual PCB-containing soil may remain on the property but such presence has not been confirmed.

[3)] IC Group 4 includes properties where PCB levels in the surficial soil are greater than 1 ppm and have not been remediated (due to access issues or unsuitable areas). IC Group 4 properties may also include improvements (e.g., houses or driveways) where residual PCB-containing soil may remain on the property but such presence has not been confirmed, and/or the property may contain PCBs between 1 and 10 ppm at 12 inches or more below the existing ground surface.

[4)] 305 Embry Street (Parcel ID 3503) was moved from IC Group 3 into IC Group 4 based on validated data received in July 2026.

IC: Institutional Controls

PCBs: polychlorinated biphenyls

ppm: parts per million

OU-1 RESIDENTIAL PROGRAM SUMMARY
ANNISTON PCB SITE
Anniston, Alabama

Residential Removal Action Program (Lead Site AOC Zone C and D) [1]	**July 2026**
No. of properties where access has been requested to surface sample	0
No. of properties where owners/tenants have been contacted for additional sampling and/or removal activities	0
No. of properties where total access has been granted to surface sample	0
No. of properties where access has been requested for removal action activities	0
No. of properties where total access has been granted for removal action activities	0
No. of properties surface sampled in the footprint of a former structure/unsuitable area	0
No. of properties where depth, dust, and/or crawlspace samples were collected	2
No. of properties where validated analytical results were received	2
No. of properties where removal actions have been completed	0
No. of properties where removal actions are in progress	0
Total no. of properties with PCB surface results < 1 ppm	**1214**
Total no. of removal action properties completed by Solutia (as part of AOC and CD) [2][3]	**371**
Total no. of > 1 ppm PCBs removal action properties completed by EPA (confirmed)	**8**
Total no. of properties with PCB surface results ≥ 1 ppm	**34**
Properties with PCB surface results ≥ 1 ppm; Access Pending or Removal In Progress	4
Removal Action Completed, Additional Removal Action Required in the Footprint of a Former Structure	3
Removal Action Completed, Additional Removal Action Required in area Unsuitable for Removal	9
Removal Action Required in area Unsuitable for Removal	18

Special Use High Activity Residential Removal Action Program (Lead Site AOC Zone C and D)	**July 2026**
No. of properties where access has been requested to surface sample	0
No. of properties where owners/tenants have been contacted for additional sampling and/or removal activities	0
No. of properties where total access has been granted to surface sample	0
No. of properties where access has been requested for removal action activities	0
No. of properties where total access has been granted for removal action activities	0
No. of properties where depth, dust, crawlspace, and/or demo samples were collected	1
No. of properties where validated analytical results were received	1
No. of properties where removal actions have been completed	0
No. of properties where removal actions are in progress	0
Total no. of properties with PCB surface results < 1 ppm in High Activity Areas	**24**
Total no. of removal action properties completed by Solutia (as part of AOC and CD)[3]	**8**
Removal Action Completed, Additional Removal Action Required in the Footprint of a Former Structure	1

Residential Removal Action Program (Lead Site AOC Zone A)	**July 2026**
No. of properties where access has been requested to surface sample	0
No. of properties where total access has been granted to surface sample	0
No. of properties where access has been requested for removal action activities	0
No. of properties where owners/tenants have been contacted for additional sampling and/or removal activities	0
No. of properties where total access has been granted for removal action activities	0
No. of properties surface sampled in the footprint of a former structure/unsuitable area	0
No. of properties where depth, dust and/or crawlspace samples were collected	0
No. of properties where validated analytical results were received	0
No. of properties transferred from the Foothills Community Partnership and/or EPA	0
No. of properties where removal actions have been completed	0
No. of properties where removal actions are in progress	0
Total no. of properties with PCB surface results < 1 ppm sampled by Solutia and/or EPA	**440**
Total no. of properties with PCB surface results ≥ 1 ppm and Lead <400 ppm	**1**
Total no. of Special Use properties with PCB surface results ≥ 1 ppm and Lead <400 ppm in High Activity Areas	**0**
Total no. of removal action properties completed by Solutia (as part of AOC and CD)	**81**
Total no. of removal action properties where removals have been completed by Solutia (Additional Unsuitable Areas Remain)	**2**
Total no. of removal action properties Unsuitable for Removal	**2**

TABLE 3

OU-1 RESIDENTIAL PROGRAM SUMMARY
ANNISTON PCB SITE
Anniston, Alabama

Residential Removal Action Program (Lead Site AOC Zone B)	July 2026
No. of properties where access has been requested to surface sample	0
No. of properties where total access has been granted to surface sample	0
No. of properties where access has been requested for removal action activities	0
No. of properties where owners/tenants have been contacted for additional sampling and/or removal activities	0
No. of properties where total access has been granted for removal action activities	0
No. of properties surface sampled in the footprint of a former structure/unsuitable area	0
No. of properties where depth, dust and/or crawlspace samples were collected	0
No. of properties where validated analytical results were received	0
No. of properties transferred from the Foothills Community Partnership and/or EPA	0
No. of properties where removal actions have been completed	0
No. of properties where removal actions are in progress	0
Total no. of properties with PCB surface results < 1 ppm sampled by Solutia and/or EPA	**525**
Total no. of properties with PCB surface results ≥ 1 ppm and Lead <400 ppm	**1**
Total no. of Special Use properties with PCB surface results ≥ 1 ppm and Lead <400 ppm in High Activity Areas	**0**
Total no. of removal action properties completed by Solutia (as part of AOC and CD)	**120**
Total no. of removal action properties Unsuitable for Removal	**3**

Notes:

(1) Lead Site AOC Zones C and D represents Evaluation Areas 1-34. Properties in Evaluation Area 35 have been moved to OU-4.

(2) This total includes 3 Appendix 6 properties within Lead Site AOC Zones C and D where removals were completed by Solutia and two properties that were inadvertently removed with the adjacent residential properties.

(3) This total does not include properties where removal actions were completed but additional removals are required in the footprint of a former structure or in a heavily overgrown/wooded area.

TABLE 6

SPECIAL STUDIES DOWNSTREAM OF OU-4: FISH TISSUE RESULTS (FILLETS)
ANNISTON PCB SITE
Anniston, Alabama

Notes:
1. Mercury concentrations are determined by USEPA Method 7471B.

2. Total PCB Aroclor specific concentrations are determined by USEPA Method 8082A; Total PCB Homolog by USEPA Method 680; Total PCB Congener by USEPA Method 1668A.

3. Provided northing and easting represent the centroid of the individual locations sampled to form the composite sample.
4. Concentrations are reported on a wet weigh basis.
ALB: Alabama Bass
B: The compound has been found in the sample as well as its associate blank, its presence in the sample may be suspect.
BCR: Black Crappie
BLC: Blue Catfish
BLG: Bluegill
CHC: Channel Catfish
D: Concentration is based on dilutes sample analysis.
E: The compound was quantitated above the calibration range.
FTF: fish tissue filet
FTWB: fish tissue whole body
J: The compound was positively identified; however, the associated numerical value is an estimated concentration only.
J+: The analyte was positively identified; however, the associated numerical value is likely to be higher than the concentration of the analyte in the sample due to positive bias of associated QC or attributable to matrix interference
J-: The analyte was positively identified; however, the associated numerical value is likely to be lower than the concentration of the analyte in the sample due to negative bias of associated QC or attributable to matrix interference.
JN: The analysis indicates the presence of a compound for which there is presumptive evidence to make a tentative identification. The associated numerical value is an estimated concentration only.
LMB: Largemouth Bass
mg/kg: milligrams per kilogram
N: The analysis indicates the presence of a compound for which there is presumptive evidence to make a tentative identification.
ND: non-detect result
NA: Not analyzed
PCB: polychlorinated biphenyl
RES: Redear Sunfish
ST: station
U: The compound was analyzed for but not detected. The associated value is the compound quantitation limit.
UB: Compound is considered non-detect at the listed value due to associated blank contamination.
UJ: The compound was not detected above the reported sample quantitation limit. However, the reported limit is approximate and may or may not represent the actual limit of quantitation.
USEPA: United States Environmental Protection Agency

TABLE 7

SPECIAL STUDIES DOWNSTREAM OF OU-4: FISH TISSUE RESULTS (WHOLE BODY)
ANNISTON PCB SITE
Anniston, Alabama

Notes:

1. Mercury concentrations are determined by USEPA Method 7471B.

2. Total PCB Aroclor specific concentrations are determined by USEPA Method 8082A; Total PCB Homolog by USEPA Method 680; Total PCB Congener by USEPA Method 1668A.

3. Provided northing and easting represent the centroid of the individual locations sampled to form the composite sample.
4. Concentrations are reported on a wet weigh basis.
ALB: Alabama Bass
B: The compound has been found in the sample as well as its associate blank, its presence in the sample may be suspect.
BCR: Black Crappie
BLC: Blue Catfish
BLG: Bluegill
CHC: Channel Catfish
D: Concentration is based on dilutes sample analysis.
E: The compound was quantitated above the calibration range.
FTF: fish tissue filet
FTWB: fish tissue whole body
J: The compound was positively identified; however, the associated numerical value is an estimated concentration only.
J+: The analyte was positively identified; however, the associated numerical value is likely to be higher than the concentration of the analyte in the sample due to positive bias of associated QC or attributable to matrix interference
J-: The analyte was positively identified; however, the associated numerical value is likely to be lower than the concentration of the analyte in the sample due to negative bias of associated QC or attributable to matrix interference.
JN: The analysis indicates the presence of a compound for which there is presumptive evidence to make a tentative identification. The associated numerical value is an estimated concentration only.
LMB: Largemouth Bass
mg/kg: milligrams per kilogram
N: The analysis indicates the presence of a compound for which there is presumptive evidence to make a tentative identification.
ND: non-detect result
NA: Not analyzed
PCB: polychlorinated biphenyl
RES: Redear Sunfish
ST: station
U: The compound was analyzed for but not detected. The associated value is the compound quantitation limit.
UB: Compound is considered non-detect at the listed value due to associated blank contamination.
UJ: The compound was not detected above the reported sample quantitation limit. However, the reported limit is approximate and may or may not represent the actual limit of quantitation.
USEPA: United States Environmental Protection Agency

OU-1/OU-2 CONSENT DECREE SUBMITTAL SCHEDULE
ANNISTON PCB SITE
Anniston, Alabama

Item	Relevant Section of CD/SOW	Timeline for Completion	Actual Completion	Approval
RD Schedule				
Identify the Supervising Contractor	CD VI.9	10 days after Effective Date	April 5, 2021	April 16, 2021
Financial Assurance Mechanism	CD IX.27	Within 10 days after Effective Date	April 12, 2021	May 24, 2021
Financial Assurance Documentation	CD IX.27	30 days following USEPA approval of financial assurance method (June 23, 2021)	June 18, 2021	--
Submit Draft RDWP, HASP, and ERP	SOW 3.1	Within 60 days following receipt of USEPA's Authorization to Proceed regarding the Supervising Contractor (June 15, 2021)	June 15, 2021	--
Submit Revised RDWP, HASP, and ERP	SOW 3.1	Within 30 days following receipt of USEPA's Comments on the Draft RDWP, HASP and ERP (July 20, 2021)	August 19, 2021	September 10, 2021
Submit PDIWP and QAPP	SOW 3.3(a)	60 days following USEPA approval of RDWP	November 9, 2021	--
Submit Revised PDIWP and QAPP	SOW 3.3(a)	60 days following receipt of USEPA comments. Comments Received January 7, 2022 (response due March 8 2022)	March 7, 2022	--
Submit Revised PDIWP and QAPP	SOW 3.3(a)	60 days following receipt of USEPA comments. Comments Received May 3, 2022 (response due July 5, 2022)	June 9, 2022	July 5, 2022
Preliminary (30%) Design	SOW 3.3(a), 3.4	120 days following USEPA approval of PDI Report (response due March 12, 2026)	March 12, 2026	Comments Received: April 28, 2026, June 10, 2026 May 12, 2026; July 14 2026 May 21, 2026, July 23, 2026
Pre-Final (90%/95%) Design	SOW 3.5	150 days following USEPA comments on 30% Design (Residential and Nonresidential Soil due September 25, 2026; Sediment and Creek Banks due October 9, 2026; T-11 Area due October 19, 2026)		
Final (100%) Design	SOW 3.6	60 days following USEPA comments on 95% Design		
Draft Notice to Successors-In-Title	CD VIII.23.a	15 days after Effective Date	April 12, 2021	June 2, 2021
Record Notice to Successors-In-Title	CD VIII.23.a	Within 10 days after USEPA approval of draft notice	June 3, 2021	--
Certified Copies of Notices to Successors-In-Title	CD VIII.23.a	Within 10 days after recording notices	June 9, 2021	--
