Mr. George Skala IV, PG, PMP
Remedial Project Manager
United States Environmental Protection Agency, Region IV
Atlanta Federal Center
61 Forsyth St.
Atlanta, GA 30303-8960

RE: June 2026 Progress Report
Anniston PCB Site (Docket No. 1:02-cv-0749-CLM)
Anniston, Alabama

Dear Mr. Skala:

Please find attached the June 2026 Progress Report for the Partial Consent Decree between Solutia Inc., Pharmacia LLC (collectively P/S) and the United States Environmental Protection Agency (EPA) entered by the United States District Court for the Northern District of Alabama (Court) on August 4, 2003, the Consent Decree for Remedial Design/Remedial Action for Operable Unit No. 3 between P/S and the EPA entered by the Court on April 17, 2013, and the Consent Decree for Remedial Design/Remedial Action for Operable Unit Nos. 1 and 2 between P/S and the EPA entered by the Court on March 26, 2021. This report describes the work performed, unanticipated issues encountered, and analytical data received during the reporting period of June 1, 2026, through June 30, 2026. The report also describes upcoming developments anticipated for the months of July and August 2026.

If you should have any questions concerning this matter or need additional information, please call me at (256) 231-8404.

Sincerely,

E. Gayle Pittman Macolly
Principal Remediation Manager, Major Projects
Solutia Inc.

1.0 INTRODUCTION

1.1 2003 Partial Consent Decree

This monthly progress report has been prepared in accordance with the requirements of the 2003 Partial Consent Decree (2003 CD) between the United States Environmental Protection Agency (EPA), Solutia Inc. (Solutia), and Pharmacia LLC (Pharmacia) entered by the United States District Court for the Northern District of Alabama (the Court) on August 4, 2003 (Docket No. 1:02-cv-0749-CLM). The 2003 CD was issued under Sections 106, 107, and 113(g)(2) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), 42 U.S.C. §§9606, 9697, §9613(g)(2). The 2003 CD provides for and defines the performance of studies and response work by Solutia and Pharmacia at the Anniston PCB Site (Site). Solutia and Pharmacia, with Monsanto performing work on behalf of Pharmacia, are referred to as "P/S" in the subsequent sections of this report.

In accordance with Appendix A Section XIII (47), Appendix B Task 2, and Appendix G Section VI (2.5) of the 2003 CD, Section 2.0 of this report describes the work performed during the period of June 1, 2026, through June 30, 2026, including actions taken, unanticipated issues, if applicable, and analytical data received during the reporting period. Section 5.1 of this report also describes upcoming developments anticipated over the next two months for the work required by the 2003 CD, including scheduled dates of actions to be performed and planned resolutions of past or anticipated problems, if applicable.

1.2 2013 Operable Unit 3 (OU-3) Remedial Design/Remedial Action Consent Decree

The Consent Decree for the Remedial Design/Remedial Action for Operable Unit 3 (OU-3 RD/RA CD) between the EPA and P/S was entered by the Court on April 17, 2013 (Docket No. 1:02-cv-0749-CLM). The OU-3 RD/RA CD, which encompasses the Solutia plant and the adjacent closed South and West Landfills, provides for the implementation of the remedies selected for OU-3 as described in the Interim Record of Decision (IROD) issued by Region 4 of the EPA on September 29, 2011.

In accordance with Section X. Paragraph 31 of the OU-3 RD/RA CD, Section 3.0 of this report describes the work performed for the OU-3 RD/RA during the period of June 1, 2026, through June

30, 2026, including actions taken, unanticipated issues, if applicable, and analytical data received during the reporting period. Section 5.2 of this report describes the upcoming developments anticipated over the next two months for the work required by the OU-3 RD/RA CD, including scheduled dates of actions to be performed and planned resolutions of past or anticipated problems, if applicable.

1.3 2021 Operable Unit 1/Operable Unit 2 (OU-1/OU-2) Remedial Design/Remedial Action Consent Decree

The Consent Decree for the Remedial Design/Remedial Action for Operable Unit 1/Operable Unit 2 (OU-1/OU-2 RD/RA CD) between the EPA and P/S was entered by the Court on March 26, 2021 (Docket No. 1:02-cv-00749-CLM). The OU-1/OU-2 RD/RA CD provides for the implementation of the remedies selected for OU-1/OU-2 as described in the OU-1/OU-2 Record of Decision issued by Region 4 of the EPA on November 9, 2017. This includes remedial actions for soils, sediments, and groundwater at residential and non-residential properties outside of OU-3.

In accordance with the OU-1/OU-2 RD/RA CD Scope of Work (Appendix B Paragraph 5.1), Section 4.0 of this report describes the work performed for the OU-1/OU-2 RD/RA CD during the period of June 1, 2026, through June 30, 2026, including actions taken, unanticipated issues, if applicable, and analytical data received during the reporting period. Section 5.3 of this report describes the upcoming developments anticipated over the next two months for the work required by the OU-1/OU-2 RD/RA CD, including scheduled dates of actions to be performed and planned resolutions of past or anticipated problems, if applicable.

2.0 2003 CD WORK PERFORMED DURING REPORTING PERIOD

2.1 General 2003 CD Activities

2.1.1 Administrative Submittals

A 2003 CD submittal schedule for the Site that includes this reporting period's submittals and/or submittals awaiting approval or response is included as Table 1. This schedule includes the dates that documents were submitted to the EPA and the dates that approvals or comments were received from the EPA.

2.2 Operable Unit 1/Operable Unit 2 (OU-1/OU-2)

2.2.1 Residential Removal Properties Program

The residential program consists of residential work associated with the 2003 CD. This includes the non-time critical (NTC) residential activities as well as time critical residential activities associated with the Administrative Order on Consent (AOC), effective October 5, 2001.

P/S continued to work with the local municipalities and property owners to implement the approved NTC Removal Action Interim Institutional Control Program for Residential Properties (Interim IC Program). Table 2 provides a summary of the number of properties in each IC group.

2.2.1.1 Residential Removal Access

Access activity includes updating owner/tenant information, access request information, and/or EPA notification of non-compliance information. During this reporting period, access was granted for removal sampling at one property (Attachment A).

There are eight residential properties in the Residential Removal Properties Program where access has not been granted. One property granted access and is pending data validation. The properties are summarized in Table 3, and a description of each property's status is presented in Table 4.

2.2.1.2 Residential Removal Activities

During this reporting period, P/S performed sampling at three properties in Evaluation Areas 1-35.

2.2.2 OU-1/OU-2 Non-Residential Program

P/S continued to perform the required routine inspections of the Central Staging and Soil Management Area (CSSMA) and South Staging and Soil Management Area (SSSMA). No adverse findings were noted during the inspections.

On May 12, 2026, P/S discovered that the City of Anniston (City) was excavating the roadbed on the eastern portion of the W. 10th Street bridge over Snow Creek and had transported the excavated soil to the City landfill. This soil was segregated until PCB presence could be determined. Based on nearby data, P/S determined that the soil may contain PCBs greater than 1 part per million (ppm) but less than 50 ppm. P/S then covered the soil from this excavation at the landfill for future transportation and disposal. P/S arranged for the disposal of these soils on June 25 and June 30, 2026.

The City informed P/S that the western portion of the roadbed adjacent to the 10th Street bridge was also scheduled to be excavated. Due to the absence of nearby data, and because sampling beneath the asphalt was impractical, the city agreed to place the excavated soil on plastic at the landfill for P/S to collect composite samples for disposal determination. P/S collected four composite samples from the stockpiled soil on May 20, 2026. Validated data are presented in Table 5. The data confirm that P/S have no soil management responsibilities for the soil excavated from the western portion of the roadbed adjacent to the 10th Street Bridge.

P/S informed the EPA via email of this project on May 13, 2026. P/S will document this project in the 2026 Annual Soil Management Report.

2.2.3 11th Street Ditch

During this reporting period, P/S performed the quarterly routine inspections as described in the 11th Street Operations and Maintenance Plan. No adverse findings were noted. P/S will perform the next quarterly routine inspection in September 2026.

2.3 Operable Unit 4 (OU-4)

2.3.1 OU-4 Non-Residential Program

P/S submitted the Oxford Water Works and Sewer Board Sanitary Sewer Upgrade Sampling plan on April 6, 2026. The EPA approved the sampling plan on April 8, 2026. Validated data are presented in Table 6.

2.4 Special Studies

Validated data for the composite sediment samples collected in November 2025 are presented on Table 7. P/S continued the fish-tracking study for the Special Studies Downstream of OU-4.

2.5 Technical Assistance Plan Grant

The Technical Advisor (TA), Mr. Bertrand Thomas, P.G., reviews Site-related documents and conveys information from these documents to the CAG and the community.

On June 10, 2026, the West Anniston Foundation held a community education forum with members of the community to discuss the cleanup of the Anniston PCB Site. The guest speaker was Mr. George Skala, the EPA's Remedial Project Manager. The meeting was facilitated by the TA.

2.6 Community Advisory Group

There was no CAG meeting scheduled for June. The next CAG meeting is scheduled for July 14, 2026, at the Oxford Civic Center.

3.0 OU-3 RD/RA CD WORK PERFORMED DURING REPORTING PERIOD

3.1 General OU-3 RD/RA CD Activities

3.1.1 Administrative Submittals

A CD submittal schedule for OU-3 that includes this reporting period's submittals and/or submittals awaiting approval or response is included as Table 8. This schedule includes the dates that documents were submitted to the EPA and the dates that approvals or comments were received from the EPA.

3.2 Remedial Action

On May 26, 2026, P/S began upgrades of CTS #3 and the SWMU 1 well controls to address system operational issues. This work is expected to be completed in August 2026.

P/S completed soil sampling on June 16, 2026, to support construction of Carbon Treatment System #4. The data will be reported once the validation process is complete.

4.0 OU-1/OU-2 RD/RA CD WORK PERFORMED DURING REPORTING PERIOD

4.1 General OU-1/OU-2 RD/RA CD Activities

4.1.1 Administrative Submittals

A CD submittal schedule for the OU-1/OU-2 RD/RA CD that includes this reporting period's submittals and/or submittals awaiting approval or response is included as Table 9. This schedule includes the dates that documents were submitted to the EPA and the dates that approvals or comments were received from the EPA.

4.1.2 OU-1/OU-2 Non-Residential Program

On March 12, 2026, P/S submitted the Preliminary (30%) Remedial Design (PRD) documents for OU-1/OU-2. The PRD documents included three components: 1) Residential and Nonresidential Soil, 2) Sediment and Creek Banks, and 3) the T-11 Area.

EPA provided comments on the Residential and Nonresidential Soil PRD on April 28, 2026, and P/S submitted responses on June 4, 2026. EPA provided additional comments on June 10, 2026. P/S will incorporate the additional comments in the Pre-Final (90%/95%) Remedial Design, scheduled for submission by September 25, 2026.

On June 2, 2026, P/S collected a groundwater sample from CMW-3 as requested in the EPA's additional comments. The data will be reported once the validation process is complete.

On May 12, 2026, EPA provided a comment on the Sediment and Creek Banks PRD. P/S submitted a response to this comment on June 26, 2026. This response will be incorporated into the Pre-Final (90%/95%) Remedial Design submittal, scheduled for submission by October 9, 2026, if no additional comments are received from the EPA.

EPA provided comments to the T-11 Area PRD on May 21, 2026. P/S submitted a response to comments on June 29, 2026. These responses will be incorporated into the Pre-Final (90%/95%) Remedial Design submittal, scheduled for submission by October 19, 2026, if no additional comments are received from the EPA.

On March 11, 2026, P/S submitted Revision 2 of the Unified Federal Policy – Quality Assurance Project Plan (QAPP) that is a component of the PRD. EPA provided comments to the QAPP on May 28, 2026. P/S are currently preparing a response to those comments as well as a revised QAPP. On June 30, P/S held a conference call with EPA and the Special Master to the Court, to discuss whether P/S can proceed with the proposed additional sampling efforts in support of the Remedial Design prior to EPA approving the revised QAPP.

5.0 WORK SCHEDULED

5.1 2003 PCD Anticipated Work Activities

During the months of July and August 2026, the following work elements are anticipated:

- Obtain and/or process access for performing residential sampling and removal activities in OU-1/OU-2 according to the Supplemental Sampling and Analysis Plan (SSAP) and the Addendum to the NTC Removal Action Work Plans for the Site (as necessary);
- Perform surface, depth, indoor dust and/or crawl space sampling of residential properties in OU-1/OU-2 as access is provided (as necessary);
- Perform residential removal activities according to the associated work plans (as necessary);
- Perform CSSMA and SSSMA inspection and maintenance requirements in accordance with the approved CSSMA Operating and Closure Plan, the approved SSSMA Operating and Closure Plan, and the SSSMA Interim Operations and Maintenance Plan;
- Prepare and submit a Construction Support Work Plan for the sewer main project in Oxford;
- Continue to implement the Special Studies Downstream of OU-4 in accordance with the Work Plan/Field Sampling Plan and QAPP;
- Respond to the EPA's comments, as necessary, on deliverables submitted to the EPA for approval; and
- The CAG will hold a regularly scheduled meeting on July 14, 2026, at the Oxford Civic Center.

5.2 OU-3 RD/RA CD Anticipated Work Activities

During the months of July and August 2026, the following work elements are anticipated:

- Complete the CTS #3 and SWMU 1 well control upgrades; and
- Respond to the EPA's comments, as necessary, on deliverables submitted to the EPA for approval.

5.3 OU-1/OU-2 RD/RA CD Anticipated Work Activities

During the months of July and August 2026, the following work elements are anticipated:

- Complete the additional soil and sediment sampling in support of the Remedial Design;
- Complete the quarterly T-11 groundwater sampling in support of the Remedial Design;
- Complete the abandonment of the Eastside wells and piezometers; and
- Respond to the EPA's comments, as necessary, on deliverables submitted to the EPA for approval.

INTERIM IC GROUP COUNTS
ANNISTON PCB SITE
Anniston, Alabama

Area	IC Group 2[1]	IC Group 3[2]	IC Group 4[3]	Total
OU-1/2	315	99	43	**457**
OU-4	12	6	0	**18**
Total	**327**	**105**	**43**	**475**

[1)] IC Group 2 includes properties where residual PCB-containing soil may remain on the property but such presence has not been confirmed (e.g., PCBs beneath structures or driveways).

[2)] IC Group 3 includes properties where PCB levels in the surficial soil are less then 1 ppm, but are between 1 and 10 ppm at 12 inches or more below the existing ground surface. IC Group 3 properties may also include improvements (e.g., houses, driveways) where residual PCB-containing soil may remain on the property but such presence has not been confirmed.

[3)] IC Group 4 includes properties where PCB levels in the surficial soil are greater than 1 ppm and have not been remediated (due to access issues or unsuitable areas). IC Group 4 properties may also include improvements (e.g., houses or driveways) where residual PCB-containing soil may remain on the property but such presence has not been confirmed, and/or the property may contain PCBs between 1 and 10 ppm at 12 inches or more below the existing ground surface.

IC: Institutional Controls

PCBs: polychlorinated biphenyls

ppm: parts per million

Anniston, Alabama

Residential Removal Action Program (Lead Site AOC Zone C and D) [1]	**June 2026**
No. of properties where access has been requested to surface sample	0
No. of properties where owners/tenants have been contacted for additional sampling and/or removal activities	0
No. of properties where total access has been granted to surface sample	0
No. of properties where access has been requested for removal action activities	0
No. of properties where total access has been granted for removal action activities	1
No. of properties surface sampled in the footprint of a former structure/unsuitable area	2
No. of properties where depth, dust, and/or crawlspace samples were collected	1
No. of properties where validated analytical results were received	0
No. of properties where removal actions have been completed	0
No. of properties where removal actions are in progress	0
Total no. of properties with PCB surface results < 1 ppm	**1214**
Total no. of removal action properties completed by Solutia (as part of AOC and CD) [2][3]	**371**
Total no. of > 1 ppm PCBs removal action properties completed by EPA (confirmed)	**8**
Total no. of properties with PCB surface results ≥ 1 ppm	**34**
Properties with PCB surface results ≥ 1 ppm; Access Pending or Removal In Progress	4
Removal Action Completed, Additional Removal Action Required in the Footprint of a Former Structure	3
Removal Action Completed, Additional Removal Action Required in area Unsuitable for Removal	9
Removal Action Required in area Unsuitable for Removal	18

Special Use High Activity Residential Removal Action Program (Lead Site AOC Zone C and D)	**June 2026**
No. of properties where access has been requested to surface sample	0
No. of properties where owners/tenants have been contacted for additional sampling and/or removal activities	0
No. of properties where total access has been granted to surface sample	0
No. of properties where access has been requested for removal action activities	0
No. of properties where total access has been granted for removal action activities	0
No. of properties where depth, dust, crawlspace, and/or demo samples were collected	0
No. of properties where validated analytical results were received	0
No. of properties where removal actions have been completed	0
No. of properties where removal actions are in progress	0
Total no. of properties with PCB surface results < 1 ppm in High Activity Areas	**24**
Total no. of removal action properties completed by Solutia (as part of AOC and CD)	**9**

Residential Removal Action Program (Lead Site AOC Zone A)	**June 2026**
No. of properties where access has been requested to surface sample	0
No. of properties where total access has been granted to surface sample	0
No. of properties where access has been requested for removal action activities	0
No. of properties where owners/tenants have been contacted for additional sampling and/or removal activities	0
No. of properties where total access has been granted for removal action activities	0
No. of properties surface sampled in the footprint of a former structure/unsuitable area	0
No. of properties where depth, dust and/or crawlspace samples were collected	0
No. of properties where validated analytical results were received	0
No. of properties transferred from the Foothills Community Partnership and/or EPA	0
No. of properties where removal actions have been completed	0
No. of properties where removal actions are in progress	0
Total no. of properties with PCB surface results < 1 ppm sampled by Solutia and/or EPA	**440**
Total no. of properties with PCB surface results ≥ 1 ppm and Lead <400 ppm	**1**
Total no. of Special Use properties with PCB surface results ≥ 1 ppm and Lead <400 ppm in High Activity Areas	**0**
Total no. of removal action properties completed by Solutia (as part of AOC and CD)	**81**
Total no. of removal action properties where removals have been completed by Solutia (Additional Unsuitable Areas Remain)	**2**
Total no. of removal action properties Unsuitable for Removal	**2**

TABLE 3

OU-1 RESIDENTIAL PROGRAM SUMMARY
ANNISTON PCB SITE
Anniston, Alabama

Residential Removal Action Program (Lead Site AOC Zone B)	**June 2026**
No. of properties where access has been requested to surface sample	0
No. of properties where total access has been granted to surface sample	0
No. of properties where access has been requested for removal action activities	0
No. of properties where owners/tenants have been contacted for additional sampling and/or removal activities	0
No. of properties where total access has been granted for removal action activities	0
No. of properties surface sampled in the footprint of a former structure/unsuitable area	0
No. of properties where depth, dust and/or crawlspace samples were collected	0
No. of properties where validated analytical results were received	0
No. of properties transferred from the Foothills Community Partnership and/or EPA	0
No. of properties where removal actions have been completed	0
No. of properties where removal actions are in progress	0
Total no. of properties with PCB surface results < 1 ppm sampled by Solutia and/or EPA	**525**
Total no. of properties with PCB surface results ≥ 1 ppm and Lead <400 ppm	**1**
Total no. of Special Use properties with PCB surface results ≥ 1 ppm and Lead <400 ppm in High Activity Areas	**0**
Total no. of removal action properties completed by Solutia (as part of AOC and CD)	**120**
Total no. of removal action properties Unsuitable for Removal	**3**

Notes:

(1) Lead Site AOC Zones C and D represents Evaluation Areas 1-34. Properties in Evaluation Area 35 have been moved to OU-4.

(2) This total includes 3 Appendix 6 properties within Lead Site AOC Zones C and D where removals were completed by Solutia and two properties that were inadvertently removed with the adjacent residential properties.

(3) This total does not include properties where removal actions were completed but additional removals are required in the footprint of a former structure or in a heavily overgrown/wooded area.

Notes:

DUP: field duplicate

J: The analyte was positively identified; the associated numerical value is the approximate concentration of the analyte in the sample.

mg/kg: milligrams per kilogram

PCB: polychlorinated biphenyl

OWWSB: Oxford Wastewater Sewer Board

UJ: The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the actual limit of quantitation necessary to accurately and precisely measure the analyte in the sample.

Notes:

1. Mercury concentrations are determined by USEPA Method 7471B; Grain Size by Method D7928/D6913; Total Organic Carbon by Lloyd Kahn;

2. Total PCB Aroclor specific concentrations are determined by USEPA Method 8082A; Total PCB Homolog by USEPA Method 680; Total PCB Congener by USEPA Method 1668A.

3. Provided northing and easting represent the centroid of the individual locations sampled to form the composite sample.

ft bgs: feet below ground surface
µg/kg: micrograms per kilogram
max: maximum
mg/kg: milligrams per kilogram
min: minimum
µm: micrometer
mm: millimeter
ND: non-detect result
NA: Not analyzed
PCB: polychlorinated biphenyl
USEPA: United States Environmental Protection Agency

Work Plans

TABLE 9

OU-1/OU-2 CONSENT DECREE SUBMITTAL SCHEDULE
ANNISTON PCB SITE
Anniston, Alabama

Item	Relevant Section of CD/SOW	Timeline for Completion	Actual Completion	Approval
RD Schedule				
Identify the Supervising Contractor	CD VI.9	10 days after Effective Date	April 5, 2021	April 16, 2021
Financial Assurance Mechanism	CD IX.27	Within 10 days after Effective Date	April 12, 2021	May 24, 2021
Financial Assurance Documentation	CD IX.27	30 days following USEPA approval of financial assurance method (June 23, 2021)	June 18, 2021	--
Submit Draft RDWP, HASP, and ERP	SOW 3.1	Within 60 days following receipt of USEPA's Authorization to Proceed regarding the Supervising Contractor (June 15, 2021)	June 15, 2021	--
Submit Revised RDWP, HASP, and ERP	SOW 3.1	Within 30 days following receipt of USEPA's Comments on the Draft RDWP, HASP and ERP (July 20, 2021)	August 19, 2021	September 10, 2021
Submit PDIWP and QAPP	SOW 3.3(a)	60 days following USEPA approval of RDWP	November 9, 2021	--
Submit Revised PDIWP and QAPP	SOW 3.3(a)	60 days following receipt of USEPA comments. Comments Received January 7, 2022 (response due March 8 2022)	March 7, 2022	--
Submit Revised PDIWP and QAPP	SOW 3.3(a)	60 days following receipt of USEPA comments. Comments Received May 3, 2022 (response due July 5, 2022)	June 9, 2022	July 5, 2022
Preliminary (30%) Design	SOW 3.3(a), 3.4	120 days following USEPA approval of PDI Report (response due March 12, 2026)	March 12, 2026	Comments Received: April 28, 2026 May 12, 2026 May 21, 2026
Pre-Final (90%/95%) Design	SOW 3.5	150 days following USEPA comments on 30% Design (Residential and Nonresidential Soil due September 25, 2026; Sediment and Creek Banks due October 9, 2026; T-11 Area due October 19, 2026)		
Final (100%) Design	SOW 3.6	60 days following USEPA comments on 95% Design		
Draft Notice to Successors-In-Title	CD VIII.23.a	15 days after Effective Date	April 12, 2021	June 2, 2021
Record Notice to Successors-In-Title	CD VIII.23.a	Within 10 days after USEPA approval of draft notice	June 3, 2021	--
Certified Copies of Notices to Successors-In-Title	CD VIII.23.a	Within 10 days after recording notices	June 9, 2021	--

TABLE 9

OU-1/OU-2 CONSENT DECREE SUBMITTAL SCHEDULE
ANNISTON PCB SITE
Anniston, Alabama

Item	Relevant Section of CD/SOW	Timeline for Completion	Actual Completion	Approval
Submit certificates of insurance naming USEPA as an additional insured	CD XI.41	15 days prior to commencing on-site Work		
Identify a Community Involvement Coordinator (if requested)	-	15 days following USEPA request		
RA Schedule				
Award RA Contract	-	120 days after USEPA Notice of Authorization to Proceed with RA		
Submit RAWP	SOW 4.1	Submit with Award of RA Contract		
Designate IQAT	SOW 4.2	-		
Pre-Construction Conference	SOW 4.3(a)	Within 30 days after approval of RAWP		
Start of Construction	-	Within 60 days after approval of RAWP		
Completion of Construction	SOW 4.6(b)	as described in approved RAWP		
Pre-Final Inspection	SOW 4.6(b)	Within 14 days following completion of construction		
Pre-Final Inspection Report	SOW 4.6(d)	Within 14 days following completion of Pre-Final Inspection		
Final Inspection	SOW 4.7	Within 14 days following completion of work identified in Pre-Final Inspection Report		
RA Report	SOW 4.6(d)	60 days following final inspection		
Monitoring Report	SOW 4.7(b)	to be determined		
Work Completion Report	SOW 4.9(b)	to be determined		
Periodic Review of Support Plan	SOW 4.8	for Five-Year Reviews, triggered by start of first RA on 6/8/2015		

Notes:
Effective date is March 26, 2021.
